

LUCAS-CIDE® 3-Step Disinfecting Process

step 1

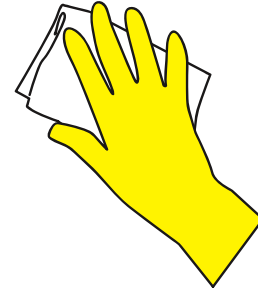

Spray on surface.

step 2

Wait 10 minutes.

step 3

**Wipe.
Surface is now
disinfected.**

Sprayed LUCAS-CIDE must rest on surface for 10 minutes to achieve 100% disinfection; killing 100% of bacteria, fungus, and virus. Following this process will minimize the risk of spreading infectious disease and offer the best possible results.

* If you are not using LUCAS-CIDE read the label on your disinfectant bottle for proper directions.
